INSTRUCTION

PhD student of University of Pavia (XXXII cycle), about the research project: “Slow movements in alpine terrains analyzed combining different technologies: SAR interferometry, UAV-based remote sensing and GPS measurements”, within the project ALPSMOTION.

Graduated in Applied Geological Science (Master degree) in 2016 at University of Pavia, vote 110/110 and praise. Title Master thesis: Geological survey and 3D modelling of tectonic Unit San Remo-Monte Saccarello (Ligurian Alps).

Graduated in Geological Science in 2014 at University of Pavia, vote 110/110 and praise. Title thesis: displacement movements of rock glacier with feature tracking software applied at multitemporal DTMs.

Graduate in Surveyor at Giovanni Falcone Institute of Loano (SV) in 2011, vote 90/100.

PROFESSIONAL EXPERIENCES

Tutor activity at University of Pavia, for Cartographic and Geological Survey courses.

Summer stage in the technical office of Comune di Calice Ligure, in August 2011 and August 2010.

SKILLS

Excellent knowledge of Windows and Office. Certificated by ECDL.

Excellent knowledge of AUTOCAD and GIS (ARCGIS e QGIS) software.

Good knowledge of remote sensing software (ENVI)

Good knowledge of Synthetic Aperture Radar Interferometry (SARscape)

Good knowledge of Python software

Good knowledge of graphic software (PHOTOSHOP)

Good knowledge of topographic instrument for the survey.

Good knowledge of English language.

Driving licence A and B.

INTERESTS

Passion for the high mountain and for the snow sports like ski, skialps and climbing.
